Global Bank

Embracing DataOps with Enov8 TDM!

BACKGROUND

As part of its commitment to delivering exceptional customer experiences, this “international Asia Pacific bank”, a global 2000 company, is continuously developing and improving applications for both customers and supporting internal services.

However, despite its adoption of DevOps and other Agile methodologies, its lack of fast, on-demand access to realistic (production-like) and secure test data, across the software development lifecycle, prevented the rapid time-to-market it needed.

QUICK FACTS

This “global bank”, based in APAC, is a major financial services company serving over 5 million retail customers and more than 80,000 corporate clients in 34 global markets.

It provides personal and business banking, institutional banking, and wealth management services.

Sector:	Finance
Use case:	Test Data
Region:	APAC
Product:	Test Data Mgr

CASE STUDY

PARTNERING WITH ENOV8

Driven by the objective of streamlining data analysis, securing information and improving compliance.

Our client approached various well known Test Data Vendors to find a solution that could address their “Test Data” challenges.

“Leveraging DevOps can be challenging, but Enov8 gives organizations a significant advantage by providing a DataOps framework that speeds up the process.”

Head of Non-Production Data

After careful review, they selected Enov8's "**Holistic Test Data Management**" solution and implemented it across all business divisions, providing the company with high-quality test data to drive agile development while remaining compliant.

THE OUTCOMES

Through leveraging Enov8 TDM, aka Data Compliance Suite, and modules like

- Data Profiling,
- Data Masking,
- Data Validation &
- Data DevOps Manager,
- Data View

The bank was able to create a “Data Factory” that allowed the traditional process to be fully automated. Thus, delivering repeatability, efficiency, security & quality

“With DataOps, organizations are empowered to bring innovative products and services to market faster than ever. “

Something that historically had been disjoint, non-standardized and heavily manual.

CASE STUDY

KEY WINS

- Automated, AI based, “Sensitive Data” Discovery, across 1000s of Heterogeneous Data Sources.
- Rapid & Non-Reversible Masking of all “sensitive data”. Simplifying safe development & testing, both On and Offshore.
- Supplementation of “Fake Data” through use of intelligent “Data Fabrication” methods.
- Data Provisioning reduced from weeks to minutes through use of “Tidy Databases” (Clones).
- Avoidance of Data Contention across teams & tribes through elegant “Test Data Booking” portal.
- Company was now fully compliant with key Data “Privacy regulations” like GDPR, HIPAA & PCI-DSS.

Did you Innovate?
“YES! I can safely say we Innovated with Enov8”

ABOUT ENOV8

Enov8 is an “Enterprise IT Intelligence” Innovator with a unique framework called EcoSystem. A framework that allows us to deliver solutions that promote better visualization and management across your enterprise IT Landscape, including Environments, Data & your operations.

Key Outcomes of our platform, & the integrated solutions, include IT Environments, Data & Release Transparency, Operational Standardization, Enterprise Orchestration, DevOps & DataOps Automation, Streamlined Delivery, Securitization & IT Cost Optimization.
