1 Release Board
Get an executive-level view of each release, including type, RAG status, systems, teams, work items, events, bookings, and test status.

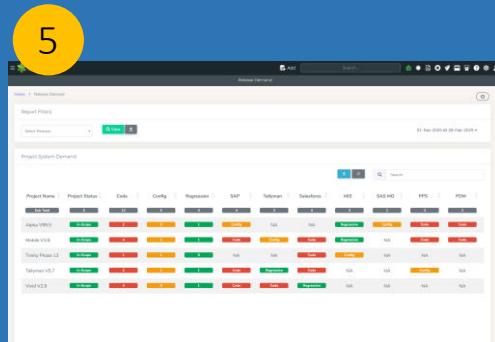

2 Release Master Planning
Align cross-product and team development, testing, and deployment cycles with strategic roadmaps for seamless coordination.

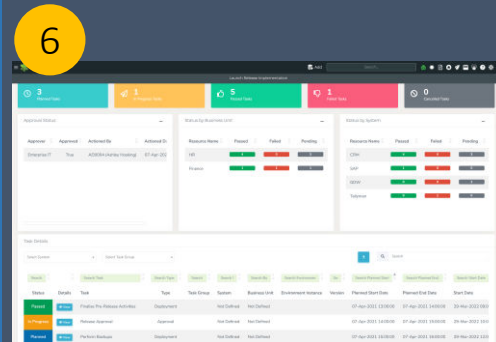

3 Product Team Tracking
Track project or product teams' progress, dependencies, and readiness to ensure smooth and aligned releases.

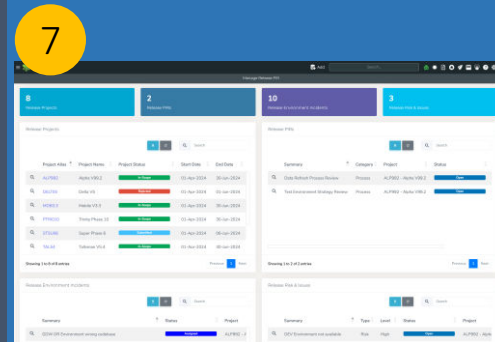

4 Release Calendars
Schedule and share critical events, release dates, milestones, and dependencies with interactive planning tools.

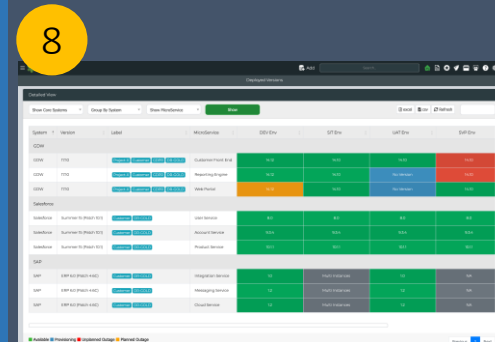

5 Demand Management
Optimize IT environment usage, manage demand, and prevent conflicts with advanced environment & System booking capabilities.

6 Implementation Plans & Runsheets
Standardize implementation processes with structured deployment plans and step-by-step execution runsheets.

7 PIR & Continuous Improvement
Analyze release & project performance, identify lessons learned, and drive ongoing process improvements.

8 Intelligent Dashboards
Monitor release progress, detect bottlenecks, and enhance decision-making with real-time analytics and information walls.
